TRUSTEES' REPORT.

To His Excellency the Governor and the Honorable Council.

The trustees of the Worcester Lunatic Hospital respectfully submit their report for the year ending Sept. 30, 1895, being the sixty-third annual report of the institution. With it they submit the report of the superintendent, including full statistical tables. The treasurer's report, signed in his temporary absence by the superintendent, is also submitted.

The new farm building has been opened for use. It will be occupied by about fifty men, and we believe that it will be an important agency in improving the health and increasing the comfort of many male inmates of the hospital. Proper classification has been long recognized as one of the first duties of hospital management, and by the use of the farm-house we shall be able to separate patients reasonably quiet and orderly, able to accomplish a certain amount of work on the farm, from the more excitable and from the feeblers patients in the main building. To these insane farm laborers greater freedom can be given than if they were kept with the other patients, and a somewhat more liberal diet can be furnished them without causing discontent to others. In this way the ambition of patients may be stimulated to obtain like privileges, and the farm-house may thus become an important curative and remedial agency. We do not believe that the cost of caring for the inmates of the new building will be much greater than that of the same number of patients in the main building.

Toward the close of the financial year the superintendent prepared and submitted to the trustees a plan for the regular

and permanent employment of a pathologist, and we refer to the matter here, though the plan will not be put into operation until the year 1895-96. The proposed measure we believe to be the most important undertaken in the hospital for many years. It has been a cause of reproach to the lunatic hospitals of Massachusetts, as well as to those of other States, that they are little more than enormous boarding-houses for the care of the insane, — well-managed boarding-houses, it is admitted, but accomplishing little for the advancement of medical and pathological science. The critics just mentioned have sometimes overlooked the great practical difficulties involved in the proper care of hundreds of helpless people. Sound administration is our first duty, and executive ability in the officers of the hospital is the one quality of daily necessity. At the same time, in common with our critics, we have regretted that the vast amount of valuable material for scientific observation afforded by lunatic hospitals has been wasted in great degree, owing to the incessant and pressing demands made by administrative duties upon every member of the present hospital staff.

In order to secure scientific study without interference with proper administration, the superintendent proposed, and the trustees heartily approved, the appointment of a pathologist, thoroughly educated, familiar with recent scientific investigation, who should devote his whole time to scientific work. The duty of this officer will be the study of the insane, and not primarily their care and treatment; but we believe that his labors will be of the highest indirect value in promoting the well-being, the health and the cure of the inmates of the hospital.

The advance of medical science must ordinarily precede the advance of curative treatment. The temper and habits of the successful student and teacher differ from those of the successful practitioner, and he can render to practitioner and patient the most effective service when he is freed from the practitioner's cares and duties. For these reasons we believe that the additional expense incurred by the appointment of a pathologist, who shall give his whole time to study, will be money well spent by the State in the care of its insane wards and in the general interest of humanity.

During the year Dr. Maurice W. Pearson resigned his position, after a faithful service of four years. Drs. Edwin D.

Boynton and Appleton H. Pierce have been appointed to fill the vacancies caused by the resignation of Dr. Pearson and that of Dr. Jones which took effect Jan. 1, 1895. Mr. Melvin Lang, the farmer, resigned his position June 1, on account of ill health.

Dr. Quinby and his assistants have given to the affairs of the hospital the same care and devotion which they have always manifested in past years.

Oct. 1, 1895.

WORCESTER, MASS., Oct. 26, 1895.

I hereby certify that I have this day carefully compared the treasurer's statement of disbursements for the year ending Oct. 1, 1895, with the vouchers on file at the Worcester Lunatic Hospital, and believe it to be correct. I have also inspected the securities representing the invested funds of the institution, and find that their market value is as stated.

GEORGE L. CLARK,
Auditor of Accounts.

SUPERINTENDENT'S REPORT.

To the Trustees of the Worcester Lunatic Hospital.

I herewith respectfully submit the following report of the hospital for the year ending Sept. 30, 1895, it being the sixty-third annual report.

There remained at the hospital Oct. 1, 1894, 924 patients, — 429 men and 495 women. During the year 269 men and 243 women were admitted, 184 men and 180 women were discharged and 59 men and 52 women died, leaving at the end of the official year 961 patients, — 455 men and 506 women. Of this number 269 were supported by the State, 545 by cities and towns and 147 by friends. Of the 364 discharged, 87, including 4 habitual drunkards (women), were reported recovered; 83, including 1 habitual drunkard (woman), were much improved; 65 improved; and 129, including 1 habitual drunkard (woman), not improved. Nineteen men and 29 women were removed by the overseers of the poor; 41 men and 30 women were discharged to the care of the Board of Lunacy and Charity, to be removed from the State; 2 men and 3 women were transferred to Tewksbury; 20 men and 10 women to the Worcester Insane Asylum; 7 men and 3 women to the Boston Lunatic Hospital; 6 men to the State Farm; and 2 women were boarded out. Eight men escaped and were not returned to the hospital at the end of the official year.

There were 69 less admissions than in the previous year, but, as the number of discharges and deaths was correspondingly less, as compared with the admissions, there remained at the close of the year a net gain of 37 persons.

The daily average number was 922.34. The highest monthly average was 951.41, in July, and the lowest 893.5, in February.

The percentage of recoveries calculated upon the average number of discharges and deaths was 18.31; calculated on the number of admissions, it was 21.28.

The death rate was 12.03, calculated upon the average number of patients, and 7.72 on the total number under treatment.

No epidemic prevailed, and there has been but little sickness of an acute character. Among the causes of death 3 were from pneumonia and 1 each from acute mania, acute melancholia, bronchitis, dysentery and puerperal eclampsia. One man committed suicide by hanging. All other deaths were from incurable brain disease. The patient who committed suicide was sent to the hospital from the House of Correction at South Boston, where he was under sentence for breaking and entering. He had been four months at the hospital, and had never shown suicidal tendencies.

During the winter months the wards of the hospital were opened on Mondays, from 2 to 5 P.M., to the class in psychology of President Hall of Clark University. Some twenty gentlemen availed themselves of this opportunity for clinical instruction, and, by their constant attendance and the manifest interest with which they followed the various cases brought to their notice, showed their appreciation of this attempt on the part of the hospital to utilize the material at its disposal for the purposes of instruction and the advancement of the specialty, — an attempt which we hope and believe is but the beginning of a more extended and systematic effort in the same direction, and one which will bring the two institutions into closer relations and result to their mutual advantage.

In this connection it is proper to state that it has been decided to add to the medical staff of the hospital a pathologist and specialist in nervous diseases. With this end in view, we have for some time been in correspondence with some of the leading men in the specialty, and as a result have engaged Dr. Adolf Meyer to fill this position, and we hope that he will be able to enter upon his work here on the first of November. Dr. Meyer graduated at the University of Zurich, and after a year spent at Paris, Edinburgh and London in post-graduate work, he returned to Zurich and entered the laboratory of Prof. Aug. Forel, where he paid special attention to comparative anatomy of the nervous system and did much original and

valuable work. For the past three years he has been the resident pathologist at the insane hospital at Kankakee, Ill., holding at the same time the position of docent in neurology at the University of Chicago. Dr. Meyer will make the neurological examinations in all new admissions. He will see that full and proper records are made, and will follow in the wards any cases that may be of special interest. He will direct the pathological work, will give stated clinical instruction to the assistant physicians, and counsel and assist them in the more complete and exhaustive study of their cases, and suggest topics for original investigation. That he may have time for this and for his own special work, he will be relieved from all routine duties connected with the institution, and be free to devote his time and energies to the strictly scientific side of the specialty.

It is our purpose to furnish at the Worcester Lunatic Hospital such facilities for the study of nervous diseases, both on the practical and scientific side, as to attract to the service of the hospital young medical men of advanced standing who may wish to perfect themselves in the specialty, whether with the idea of making hospital service their life work, or of finally engaging in general practice.

Our new farm-house, mention of which was made in my last report, was completed early in the spring, and is now occupied by patients. It is situated on the westerly side of Plantation Street, near our farm barns, and is conveniently and pleasantly located, having a southern and eastern exposure. It consists practically of two separate buildings: a house two stories and a half high, on the end facing Shrewsbury Street, for the farmer and his family and the necessary hired help; and a ward two stories high, facing on Plantation Street, for such male patients, with their attendants, as are employed on the farm or about the grounds. The building presents a frontage of one hundred and twenty-two feet. The house proper contains eight rooms on the first floor; a parlor and sitting-room for the farmer's family, a sitting-room and lavatory for the male help, a pantry, kitchen, serving-room, scullery, store and refrigerator room. On the second floor are chambers for the farmer's family, two double rooms for patients, bath-room, linen closet, storeroom, and one single room and a large

dormitory for female help. In the attic are three rooms, occupied by eight hired men, and a room for a night watchman. The sitting-room for the hired men has a separate entrance, and can be entirely cut off from the farmer's apartments and from the ward; and the same is true of the rooms occupied by the female help. The ward for patients faces Plantation Street and is surrounded by a piazza. On the first floor is the dining-room and attendants' room, a day room and a clothes room for patients. The bath-room, lavatory and water-closets are placed in the rear of the day room, and are entirely detached therefrom. In the second story is a dormitory thirty-one by sixty feet, a room for two attendants, a night lavatory, and two single rooms for such patients as may become excited during the night, or otherwise disturb the dormitory. This room is finished to the roof, seventeen feet in the clear, and is open on two sides to sunlight and air. It is lighted by fourteen windows, and has six dormer-windows for the purpose of ventilation. The building is heated by a sixty horse-power boiler. Every room has steam heat and is properly ventilated; the large dormitory and patients' day room having special provisions for ventilation. The windows on the first floor of the ward are not guarded, but those in the second story are protected by wire netting of a quality a little heavier than the usual mosquito netting. All the inmates of the house use the dining-room in common, but meals are served at separate hours for patients and help, and to facilitate this arrangement a steam table is provided in the serving room.

The expense of caring for patients here will no doubt be somewhat greater than in the wards of the hospital, although this will be in a measure offset by the longer working hours which this change will make possible. In any event, it seems only proper for the hospital thus, in a sense, to share with the patients the profits of their labor.

The cost of the buildings is as follows: —

To cash paid Vandreuil & Fuller, as per contract, . . .	\$27,058 55
Wire lathing substituted for wood, ...	1,217 25
Piazza, ...	510 00
Draining cellar and grading, ...	520 78

										\$34,965 96

During the year we have painted and frescoed nine of the female wards and enlarged the dining-rooms on the four Phillips wards, to better accommodate our increased number of patients, many of whom had been obliged, heretofore, to eat upon the halls or in their rooms, — a condition of things that added greatly to the work of the attendants, and made it impossible to give the patients proper service and oversight during meals.

In the building as originally constructed the wards are separated from each other by a fire-wall carried through the roof. No such cut-off was provided, however, between the administration building, chapel wing and central wards. Such a fire-wall has now been constructed, and in connection with this work four rooms, two on either side, have been finished in the connecting corridors, for reception rooms for friends of patients occupying the upper wards.

We have also made several radical alterations and improvements in the chapel. Its ventilation, always unsatisfactory, was especially so during our evening entertainments, when the air soon became exceedingly offensive. The only remedy available was to open the ventilators in the roof or the windows; but both of these methods created a disagreeable and dangerous draft, to the discomfort especially of those sitting on the stage or near the sides of the room. To obviate this difficulty two galvanized-iron flues have been carried from near the floor, under the stage, on either side, to a galvanized-iron

chamber in the roof, filled with steam coils and connected on the outside with a Van Noorden ventilator. The stairs, which formerly entered the gallery through a dark passage, have been changed, and the gallery enlarged and lighted by removing the flat arch which spanned the opening through the rear wall of the chapel and substituting therefor three light gothic arches, resting upon gothic pillars. The stage proscenium has been altered to conform in style of architecture with the rest of the room, and two windows cut through the roof behind the stage. This has been done to light Allston's painting, "The angel appearing to Peter in prison," much of the beauty of which has heretofore been lost on account of deficient lighting.

We have been obliged to make several unusually expensive repairs upon the buildings during the year. Finding that the core of our kitchen chimney had become gas eaten and was likely to fall in, we were obliged to take down and rebuild sixty feet of it. This was for some time a source of no inconsiderable annoyance in our culinary department, but the work has now been satisfactorily completed. We were obliged to replace the metal cap on our main chimney, as parts of the old one had become detached and seemed likely to fall at any time and endanger our boilers. We have also painted our farm barns, at an expense of \$694.20.

There have been several changes in the medical staff during the year. The vacancy occasioned by the resignation of Dr. Lyman Jones, mention of which was made in the last report, was filled by the appointment of Dr. Edwin D. Boynton. In May last, after a service of four years, Dr. Maurice W. Pearson resigned the position of assistant physician to take that of house officer at the city hospital in Springfield, Mass. He was a faithful and painstaking officer, and was ready at all times to devote his best energies to the welfare of the institution and the patients under his care. Dr. Appleton H. Pierce was chosen to fill the vacancy caused by the resignation of Dr. Pearson, and entered on his work here May 15, 1895. Both Dr. Boynton and Dr. Pierce came to us after the usual service at the Worcester City Hospital.

The current expenses for the year, less the amount received for the articles sold, have been \$158,549.06; dividing this by 922.34, the daily average number of patients, gives \$171.90 as

the annual cost of support, which is equivalent to a weekly cost of \$3.29.

We are indebted to the publishers of the "Worcester Daily Spy," the "Worcester Evening Gazette," the "Fitchburg Sentinel," the "Essex County Mercury," the "Lynn Transcript," the "Christian Register," "Zion's Herald" and "White Ribbon" for copies of their paper.

I wish, in conclusion, to express my appreciation of the conscientious service rendered by my medical assistants and by all in the service of the hospital. To them is due much of the success that has crowned the work of the past year. Their labors, always exacting and arduous, are often disagreeable, and they are to be commended for the fidelity, kindness and tact with which they have performed their various duties.

I would also take this occasion to express my gratitude to your Board for their continued confidence.

H. M. QUINBY,
Superintendent.

WORCESTER LUNATIC HOSPITAL, Sept. 30, 1895.

Discharged recovered, . .	3	9	12	-	-	-
improved, . . .	4	1	5	-	-	-
not improved, . .	1	-	1	-	-	-
Died, ...	1	1	2	9	11	20

Showing the Results of Thirteenth Admissions.

	Males.	Females.	Totals.	Males.	Females.	Totals.
Number of thirteenth admissions,	—	—	—	7	9	16
Discharged recovered, . .	3	8	11	—	—	—
improved, . .	3	—	3	—	—	—
not improved, . .	1	—	1	—	—	—
Died, ...	—	1	1	7	9	16

Showing the Results of Fourteenth Admissions.

	Males.	Females.	Totals.	Males.	Females.	Totals.
Number of fourteenth admissions,	—	—	—	5	8	13
Discharged recovered, . .	3	6	9	—	—	—
improved, . .	2	1	3	—	—	—
not improved, . .	—	1	1	5	8	13

Showing the Results of Fifteenth Admissions.

	Males.	Females.	Totals.	Males.	Females.	Totals.
Number of fifteenth admissions,	—	—	—	4	6	10
Discharged recovered, . .	2	4	6	—	—	—
improved, . .	2	1	3	—	—	—
not improved, . .	—	1	1	4	6	10

Showing the Results of Sixteenth Admissions.

	Males.	Females.	Totals.	Males.	Females.	Totals.
Number of sixteenth admissions,	—	—	—	3	4	7
Discharged recovered, . .	1	3	4	—	—	—
improved, . .	1	—	1	—	—	—
Remaining in the hospital Sept. 30, 1895, ...	1	—	1	3	4	7

Showing the Results of Seventeenth Admissions.

	Males.	Females.	Totals.	Males.	Females.	Totals.
Number of seventeenth admissions, . . .	-	-	-	2	3	5
Discharged recovered, . . .	2	2	4	-	-	-
not improved, . . .	-	1	1	2	3	5

Showing the Results of Eighteenth Admissions.

Number of eighteenth admissions, . . .	-	-	-	2	3	5
Discharged recovered, . . .	1	2	3	-	-	-
improved, . . .	1	-	1	-	-	-
Died, ...	-	1	1	2	3	5

Showing the Results of Nineteenth Admissions.

Number of nineteenth admissions, . . .	-	-	-	1	2	3
Discharged recovered, . . .	-	2	2	-	-	-
improved, . . .	1	-	1	1	2	3

Showing the Results of Twentieth Admissions.

Number of twentieth admissions, . . .	-	-	-	-	2	2
Discharged recovered, . . .	-	2	2	-	2	2

Showing the Results of Twenty-first Admissions.

Number of twenty-first admissions, . . .	-	-	-	-	2	2
Discharged recovered, . . .	-	1	1	-	-	-
Died, ...	-	1	1	-	2	2

Showing the Results of Twenty-second Admissions.

	Males.	Females.	Totals.	Males.	Females.	Totals.
Number of twenty-second admissions, . . .	-	-	-	-	1	1
Discharged recovered, . . .	-	1	1	-	1	1

Showing the Results of Twenty-third Admissions.

	Males.	Females.	Totals.	Males.	Females.	Totals.
Number of twenty-third admissions, . . .	-	-	-	-	1	1
Discharged recovered, . . .	-	1	1	-	1	1
